u516bu5341u516b. While the graphics aren't quite as bad as a lot of people make them out to be, everything else is. The level design is terrible and the game has no proper flow. The presentation doesn't satisfy and the gameplay is horrendous. Stay away from this. Randy Pitchford was full of u2665u2665u2665u2665u2665u2665 when he said this game didn't deserve the u2665u2665u2665u2665u2665 it gets.. u516bu5341u516b. I like this game. It is not worth the full price but the u20ac 5.99 last deal, including all extensions, were worth it. There is a lot fun playing with friends in multiplayer and online storyline coop.. I like this game. It is not worth the full price but the u20ac 5.99 last deal, including all extensions, were worth it. There is a lot fun playing with friends in multiplayer and online storyline coop.. Don't subject yourself to this. Randy can go right ahead and make this one an Epic store exclusive.. Don't subject yourself to this. I am giving this the thumbs up for no other reason than it was vastly reduced in price and in consideration of the circumstances this was made in. People forget that this product came from a very dark era of gaming where publishers had decided that their customers didn't want well crafted, interesting games with well thought out characters and an actual story that we could immerse ourselves in - oh no, what we all really wanted was Call of Duty with mindless grinding, QTE's by the bucket, oodles and oodles of immersion breaking instant deaths - that's what we really wanted according to the publishers. What was that you say? You want Dead Space? Well you are getting Call of Duty! You want Resident Evil? No you don't and you're getting Call of Duty! You want Tomb Raider? Well tough, you are getting Call of Duty! Really, you want an ACTUAL Aliens game that feels like an ALIENS GAME and has an ACTUAL ALIENS story?! Hahaha that's silly and you can think again because you are getting Call of Duty!! As an Aliens game this is terrible in almost every way, as a chance to spend some time blowing the ever loving Bejeebus out of things for Five Bucks it's passable for the price. The closest this comes to being an Alien title is towards the end where there is a stage of pure survival horror with no weapons that plays and feels just like Alien Isolation and I am sure it is because people said "Why wasn't it all like this?" that we got Alien Isolation. Running on medium to high end units the graphics still need to be set quite low because the optimisation is among the worse I have seen and will render it unplayable if you want it to look at it's best. Nevertheless, as I say five bucks for a few hours of switch your brain off violence is not that unreasonable, just finished it, have no desire to return, it is what it is.
